CAREER OBJECTIVE

Graduate of a full stack development program with experience working across the full-stack of software development. I'm looking for a role within an organization where I can grow and continue to learn from other experienced team members.

PROJECTS

Book Nook

- Built a digital library using Express Handlebars/Session where users can keep track of books they read and store them as favorites.
- Utilized Open Library and ISBNDB API's.
- Collaborated with team members in local and remote locations, while utilizing ESLint to ensure consistency though out code.

Pantry Prepper

- Built a website using Javascript that generated recipes based off the user's searched ingredient.
- Designed the website utilizing Bootstrap and CSS.
- Dynamically updated data fetched from The MealDB and Spoonacular API's.

Café Clicker

- Created a clicker-game using React that allowed users to "build" their cafe by repeatedly clicking, earning in-game accomplishments and powerups.
- Leveraged GraphQL for data queries and mutations.
